Our Services

Tiger Offshore's core services are mainly categorized as follows:

- Procurement Services for Fast Track projects
- Project Management and Engineering Services
- Piping Materials Stocking and Supply
- Pipeline Construction Equipments

We provide dedicated service of 24/7 which has been developed over the past years based on deep understanding of the needs of our Oil and Gas Industry customers. Requirements from Upstream or Downstream, we service all your needs on time and we are there when you need us. The company is run with a motto "Always Deliver On Time."

a) Procurement Services for Fast Track Projects

Since 2006, Tiger Offshore is one of the leading Procurement Services Provider in Oil & Gas field operating from Sharjah, UAE. We have a dedicated team, with proven track record, that has done nothing but strategic sourcing and procurement services for the last few years. Throughout our history, we have saved millions of dollars' worth of cost reduction through strategic sourcing and technical procurement process improvements.

Our procurement team brings unparalleled service and experience in developing proven supply chain solutions, ensuring our clients to receive what is promised, when it is promised, in a timely, cost-effective and well-executed manner.

Through our well connected global supplier networks, we are able to efficiently source anything our clients require; anywhere and from reputed sources. Our established associations with the suppliers allow us to achieve the ideal purchase, targeting value, product quality, and with our established logistics network to save time and money.

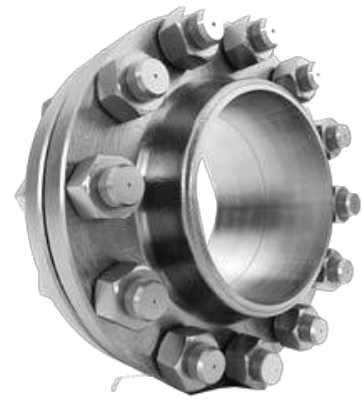

Our specialty lies in pipeline, process, engineering materials, chemicals, instrumentation and electrical items, etc, with no restrictions in scope of supply. We provide Total Piping Materials Package Solutions to Oil & Gas Companies & EPC Contractors.

Our Customers can fully rely upon Tiger Offshore for Procurement cost reduction and timely delivery of projects. We can assure a professional, quality and personalized service delivering an ample solution to the last hour requirements and hard to find items with technical backups.

b) Project Management and Engineering Services

Our Project Management and Engineering division composed of experienced engineers in various disciplines ensures the right Engineering, Project Management & control support for the oil and gas industry. We ensure design, analysis and other technical solutions in the most practical and cost effective manner.

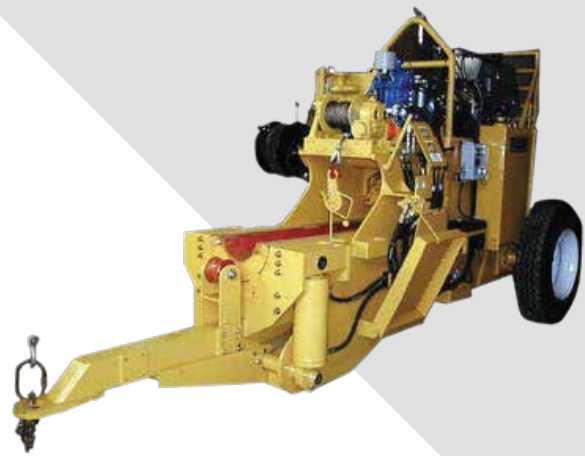

We provide consultancy services in the areas of Project Management & Controls both in-house and through our associates. Our associates are professionals with ample expertise and proven track record to provide you the best tools and easy solutions to manage your projects and business.

We are committed to work safely and ethically, being sensitive to our clients and staff alike. We are committed to our customers' utmost satisfaction.

c) Piping Materials Stocking and Supply

Stock supply is of prime importance in most of the Oil & Gas projects where time is vital in delivering the projects. Tiger Offshore keeps ample stock of piping materials in Hamriyah Free Zone, where we have strategically located our warehouse. We are one of the largest stockiest of Flanges and Fittings in Hamriyah Free Zone of various grades which are from approved manufactures of major oil and gas companies. Our material stock warehouses are built with structured and palletized stack-racking systems, operated with forklifts to handle the materials safely. We have adopted computerized inventory and sales system which enable Tiger Offshore to handle large and complex material package requirement for projects.

With a complete project based approach on all major orders and understanding of customer needs has resulted in our good track record of ensuring timely and accurate material deliveries and thus winning repeated orders. Customer requirements such as direct trucking, shipments and air-freights are handled by dedicated coordinators with vast experience in the field. Operation engineers / coordinators are well aware of the specific customer requirements w.r.t packing, markings, color-coding etc.

d) Pipeline Construction Equipments

Tiger Offshore represents PROLINE Pipeline Equipments, Canada, in UAE and Oman, manufactures of a wide variety of specialized equipment for pipeline and plant construction. We have supplied Bending machines, Pneumatic Internal Line up Clamps to some of the major Oil and Gas companies in UAE. Some of the Proline Products are Pipe Bending Machine, Pneumatic Internal Line-up Clamp, External Line-up Clamp, Pipe Facing Machine, Pipe Hooks, Rolli Cradles, and Pipe Stands for Stainless Steel, Duplex & Special Steel Pipes.
